

SUPERNAIT reference integrated amplifier

SUPERNAIT is not just a superbly musical amplifier; it's an analogue and digital audio control and connection hub that just happens to have some of the world's best audio amplification attached. SUPERNAIT's preamplifier section is directly descended from Naim's superlative reference series preamplifiers, and its power amplifier incorporates all the techniques and know-how that give voice to the traditional Naim qualities of rhythmic musicality.

WHAT DO YOU WANT TO LISTEN TO?

Along with sound quality, connection is SUPERNAIT's forte. The 21st Century has seen an explosion of music carriers, formats and delivery systems. With analogue inputs via both DIN and phono sockets, digital inputs via both coaxial and optical sockets, a combined digital optical/analogue front panel input and on-board re-clocked digital to analogue conversion, there's very little that SUPERNAIT can't handle.

SUPERNAIT is just as versatile with its outputs. In addition to the power amplifier speaker outputs, it carries separate record, preamplifier, bi-amp/subwoofer outputs, and a front panel mounted headphone output driven from a separate power amplifier. Independent record and listen selections add to the versatility, and flexible input assignment means any input socket - analogue or digital - can be assigned to any source selection button. SUPERNAIT versatility knows no bounds.

JUST ADD SPEAKERS

Once everything is connected, just add speakers, turn up the volume and listen. The versatility of SUPERNAIT doesn't disguise the fact that it is a world-class amplifier. The preamplifier section is transparent, detailed and fast - just like Naim's other preamplifiers - and the SUPERNAIT power amplifier delivers generous, muscular and musical power into almost any speaker load.

STILL NEED MORE?

An upgrade path has always been a part of the Naim offering. While SUPERNAIT caters for your connectivity needs, we've also covered your future upgrade requirements. SUPERNAIT is probably the only amplifier you'll ever need; however in true Naim style, we've still anticipated you aspiring to greater things in the future.
